// CURRICULUM VITAE · 2026

MATTIA PAGETTI

SENIOR DATA ENGINEER

pagetti.mattia@gmail.com | mattia-pagetti-40891019b
github.com/Paggio | paggio.github.io/personal-page | Milano, IT

Data engineer with six years of building data platforms on **AWS** and **Azure**: from **Spark**/**Iceberg** lakehouses and **Airflow** pipelines to **Databricks** platforms landed inside locked-down, multi-account cloud estates. Physics engineer by training, platform engineer by habit.

01 WORK EXPERIENCE

Senior Data Engineer

Nearform 03/2026 – now | Tramore, IE / Milano, IT

- I help clients build scalable **Databricks** platforms with solid CI/CD foundations, AI-ready from day one.
- For a UK healthcare provider I designed and built, end to end, a **Databricks on AWS** platform in **Terraform**: a customer-managed-VPC workspace per environment on a shared **Unity Catalog** metastore, one landing-zone KMS key for all storage and managed services, back-end **PrivateLink** and Object-Locked audit logs, all deployed through **GitHub Actions** (OIDC, tflint, checkov).
- Authored the **AWS Landing Zone Accelerator** changes Databricks needed in a locked-down multi-account organisation: scoped RCP exceptions, private VPC endpoints, and closing a remediation path that gave cluster nodes a privileged IAM role.

Senior Data Engineer ← Data Engineer

TrueLayer 02/2022 – 01/2026 | London, UK / Milano, IT

■ SENIOR DATA ENGINEER

- Designed and implemented a new data platform from the ground up: Aurora RDS snapshots loaded into **Redshift** via **ECS** and **Step Functions**, modelled in **DBT**, improving scalability and data access across teams.
- Built an internal **Python** package to streamline data workflows and governance, and let engineers query product databases directly through Redshift.
- Experimented with **MCP** servers and clients for LLM-based natural-language querying of Redshift, as Python microservices on **Kubernetes**.

■ DATA ENGINEER

- Built pipelines from microservice databases, Elasticsearch and third-party APIs into S3 (Parquet/**Iceberg**), using **Spark** on **EMR** for large volumes.
- Developed **Airflow** DAGs on Kubernetes; supported company-wide analytics through **Athena** and BI tools; managed all AWS infrastructure with **Terraform**.

Big Data Engineering Junior Specialist

Illimity 05/2020 – 02/2022 | Milano, IT

- Built and maintained data streams on Azure with **Databricks**, **Data Factory**, **Delta Lake** and **MongoDB**, delivered through Azure DevOps.

Doctoral Student

Max Planck Institute (MPSD) 09/2019 – 04/2020 | Hamburg, DE

- Computational analysis of RIXS cross-sections in realistic condensed-matter systems.

02 KEY SKILLS

MAIN STACK

`Spark` `Databricks` `Terraform` `Airflow` `Iceberg` `DBT` `Kubernetes` `Unity Catalog` `LangGraph` `SDD`

AWS

`Landing Zone (LZA)` `SCP / RCP` `PrivateLink` `KMS` `EMR` `Redshift` `Athena` `Glue` `S3` `ECS` `EKS` `Lambda` `Step Functions`

AZURE & MORE

`Data Factory` `Data Lake` `Synapse` `Purview` `MongoDB` `RabbitMQ` `GitHub Actions`

03 EDUCATION

MSc Physics Engineering

Politecnico di Milano 02/2017 – 04/2019

Nanophysics & Nanotechnology

Grade 108/110

BSc Physics Engineering

Politecnico di Milano 10/2013 – 02/2017

Grade 91/110

04 PUBLICATIONS

Determining the Electron-Phonon Coupling in Superconducting Cuprates by Resonant Inelastic X-ray Scattering: Methods and Results on $Nd_{1+x}Ba_{2-x}Cu_3O_{7-\delta}$

Politecnico di Milano 2019

The actual role of electron-phonon coupling in high-T_c superconductors, investigated.

arXiv:1906.01270
